SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

Cal OES COASTAL REGION

- Nothing significant to report.

Cal OES INLAND REGION

- See Fire Activity Slides.

Cal OES SOUTHERN REGION

Railroad Derailment, Commerce, Los Angeles County, SPILL: 18-3840

On 06/12/18 at 2311 hours, the California State Warning Center (CSWC) received a report from Burlington Northern Santa Fe Railway (BNSF) advising that two locomotives derailed in the upright position due to unknown causes.

- A gearbox was damaged causing the release of 3-4 gallons of lubricating oil to the ground.
- The release has been stopped and contained, and clean up was underway.
- No waterways were impacted.
- There were no injuries and no impacts to rail traffic.
- CSWC made notifications per SOP.

Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

Per the Cal OES Southern Region AREP on 06/12/18 at 0718 hours:

- CDFA and the U.S. Department of Agriculture (USDA) have scaled up their response to this incident, as more cases have been detected.
- CDFA confirmed there are no commercial premises currently involved and there is no public health risk due to this virus.

Activations

- San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployments

- One (1) Cal OES Southern Region Senior ESC deployed to ICP as an AREP. Operational period of 0700-1900 hours.

- See Fire Activity Slides.

Cal OES Fire Preparedness Levels		
National	Northern California	Southern California
Preparedness Level 2	Preparedness Level 1	Preparedness Level 2
	Multi-Agency Coordination System MACS Mode: 1	Multi-Agency Coordination System MACS Mode: 1

Please note: The National and Regional Preparedness Levels are maintained by the National Multi-Agency Coordination (MAC) Group and are separate from Cal OES activation levels.

INLAND REGION

Chrome, Vegetation Fire, Glenn County

Location: Hwy 162 x Forest Hwy 7, north of Elk Creek

Jurisdiction: State DPA, SRA, Tehama-Glenn Unit

Per Cal OES Duty Officers and ICS-209 as [06/13/18 at 0610 hours](#):

- 2,290 acres, [80% contained](#)
- Expected Containment: 06/14/18
- 1 structure destroyed
- Resources continue to strengthen and patrol containment lines

FIRE ACTIVITY

SOUTHERN REGION

Portola, Vegetation Fire, Los Angeles County

Location: Westwanda Dr. x Benedict Canyon Dr.

Jurisdiction: Local DPA, LRA, Los Angeles City

Start Date/Time: 06/12/18 at 1456 hours

Per the Cal OES Duty Officers as of [06/12/18 at 1934 hours](#):

- 35 acres, 10% contained
- [All CAL FIRE air and ground resources released](#)
- Cal OES Duty Officers are monitoring

Activations

- The City of Los Angeles EOC is activated at Level 3 (lowest level).

FMAG

- [On 06/12/18 at 1856 hours, a Fire Management Assistance Grant \(FMAG\) request was received. As of 06/12/18 at 2100 hours, the FMAG request has been denied.](#)

Evacuations

- [Per Cal OES Law Branch as of 06/12/18 at 2030 hours, all evacuation orders have been lifted.](#)

Evacuation Center

- An Evacuation Center has been established at Westwood Recreation Center, 1350. S Sepulveda Blvd., Los Angeles.

Santiago, Vegetation Fire, Orange County

Location: Highway 241 x Santiago Canyon Rd.

Jurisdiction: Local DPA, SRA, Contract County

Start Date/Time: 06/11/18 at 1704 hours

Per Cal OES Duty Officers and ICS-209 as of [06/13/18 at 0536 hours](#):

- 155 acres, [80% contained](#)
- Resources continue to mop up and strengthen control lines

WEATHER SYNOPSIS BY REGION

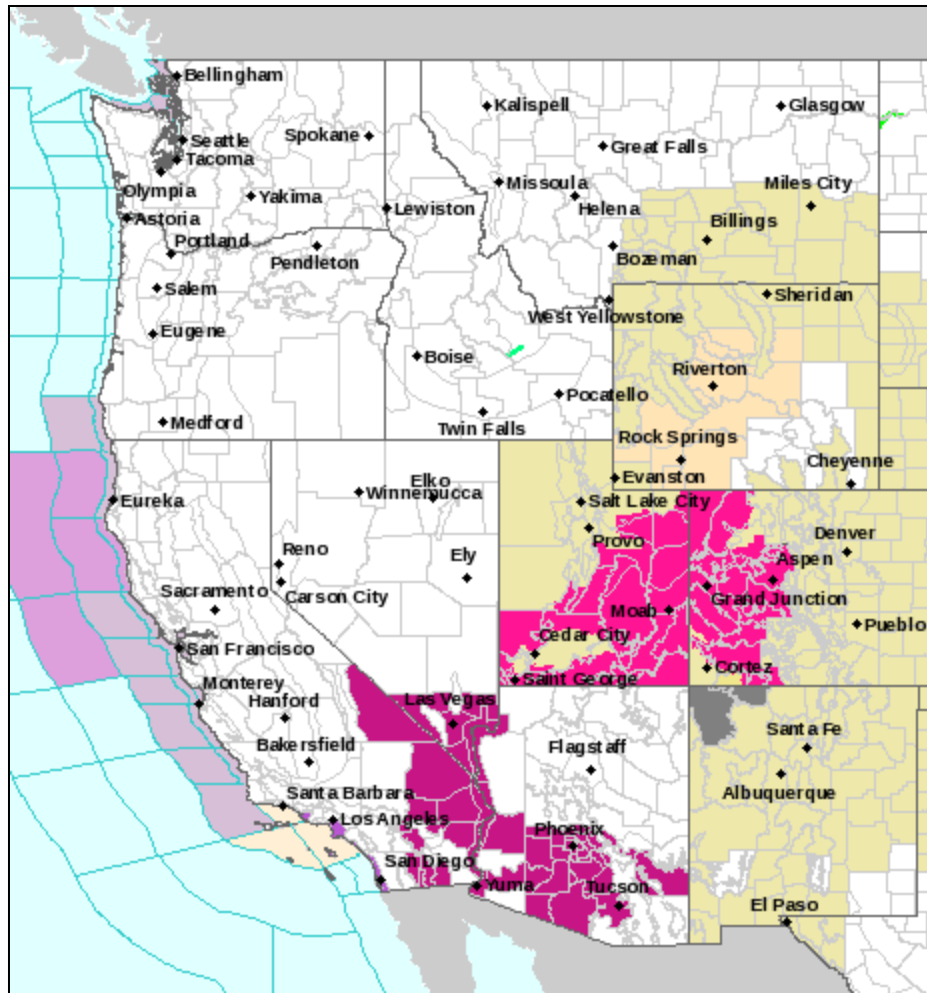

NORTHERN CALIFORNIA

High pressure that was over Northern California yesterday will be replaced by a weak trough today. Afternoon highs will be the warmest so far this year with just over 100 in the warmest inland areas with min afternoon relative humidity (RH) as low as 5-10% in the driest valleys, but mostly between 10-20% today. The low pressure trough will become stronger Thursday through Saturday and appears likely to linger into early next week. There is still some uncertainty about those events past Saturday. The trough will bring temperatures down to near seasonal values and increase RH. There will also be a chance of some mainly mountain showers or isolated thunderstorms Friday onward, mainly in the eastern areas of the region, especially in the NE quarter of the Geographic Area. More widespread and stronger north winds appear likely to develop in the northern Sacramento Valley areas Thursday. Winds will be somewhat variable but still quite northerly at times across the region Friday through the weekend.

SOUTHERN CALIFORNIA

High pressure will continue to produce clear skies with very warm temperatures today. Highs will again range from the 70s at the coast to the upper 90s to 103 in the warmest inland valleys and foothills. Minimum RH will fall into the teens for 6-8 hours each afternoon, but light winds and clear skies should allow for at least fair recovery tonight. A slow-moving trough is expected to bring much cooler weather during the second half of the week into the weekend. Onshore flow will result in breezy conditions in and near the desert areas. Expect wind gusts to 40 mph in the Antelope Valley, Banning Pass and the Kern County Mountains each afternoon Thursday into the weekend. Temperatures will drop 5-8 degrees Thursday and Friday with readings in the 80s in the valleys by the weekend. Nearly all of the subtropical moisture over the Pacific is expected to be shunted east of the area, but one or two thunderstorms will be possible along the Colorado River Valley Friday and Saturday. Cooler weather will lead to higher RH at lower elevations, but the mountains above 5,000 feet may experience single digit RH beginning Thursday. Next week, warmer and less windy weather is expected to return. No significant thunderstorm activity is expected the next 7-10 days.
